World Law Group - Merger Control Basics 2010

We are very pleased to announce the release of the “World Law Group Merger Control Basics 2010”. This booklet was designed as a quick reference guide to merger control worldwide: as such, it summarizes filing thresholds and investigation periods in 53 jurisdictions covered by the World Law Group (WLG) member firms and affiliates.

The booklet was created by the members of the WLG Antitrust & Competition Committee.

WLG is a network of 50 independent law firms on six continents with more than 260 offices in major and mid-sized commercial centres world-wide. Bahas Gramatidis & Partners is the WLG member firm in Greece.

“World Law Group Merger Control Basics 2010” provides information on two of the most important questions related to merger control. More specifically, under “Thresholds” you will find the relevant prerequisites which trigger an obligation to notify a transaction to a national competition authority. Further, “Stages” describes the procedure and the investigation periods once a transaction has been notified to a national competition authority.

We trust that the “World Law Group Merger Control Basics 2010” shall be useful in your daily work.

Our partner Dimitris Emvalomenos, contributor of the booklet for Greece, would be only happy to provide you with any clarification regarding the “World Law Group Merger Control Basics 2010” and /or send you a copy upon request.
